hi
we are a loose collective of thermal printer lovers.
we have 4-5 printers in various hacker and art spaces around the world.
Zurich[5], Chang Mai[1][2], Tel Aviv[3], and more i dont follow

we recently added a meme option. and i stumbled across your reddit post.
i dont have memes to share; I'm sure they're nothing you haven't seen.
but if you can gracefully share some with us. it will be amazing.

this is art project. this experiments are mostly not indexed and are an easy going way to share prints between communities.

yair
